Interactive Computing

- ▶ L<sup>A</sup>T<sub>E</sub>X

# Term Project

- ▶ Analyze social media data harvested with one or more of the APIs we discuss.

# Term Project

- ▶ Analyze social media data harvested with one or more of the APIs we discuss.
- ▶ Summarize your analysis in a slide presentation (max 5 minutes).

# Term Project

- ▶ Analyze social media data harvested with one or more of the APIs we discuss.
- ▶ Summarize your analysis in a slide presentation (max 5 minutes).
- ▶ Describe your analysis in detail in a written report in pdf format.

# Term Project

- ▶ Analyze social media data harvested with one or more of the APIs we discuss.
- ▶ Summarize your analysis in a slide presentation (max 5 minutes).
- ▶ Describe your analysis in detail in a written report in pdf format.
- ▶ Submit  $\text{\LaTeX}$  source for slides and written report.

# Term Project

- ▶ Analyze social media data harvested with one or more of the APIs we discuss.
- ▶ Summarize your analysis in a slide presentation (max 5 minutes).
- ▶ Describe your analysis in detail in a written report in pdf format.
- ▶ Submit  $\text{\LaTeX}$  source for slides and written report.
- ▶ Submit an IPython notebook file in which your analysis is demonstrated together with clear comments explaining all steps.

# Term Project

- ▶ Analyze social media data harvested with one or more of the APIs we discuss.
- ▶ Summarize your analysis in a slide presentation (max 5 minutes).
- ▶ Describe your analysis in detail in a written report in pdf format.
- ▶ Submit  $\text{\LaTeX}$  source for slides and written report.
- ▶ Submit an IPython notebook file in which your analysis is demonstrated together with clear comments explaining all steps.
- ▶ Submit a clearly documented python package organizing all functions and classes you created in doing your analysis.

- ▶ BB has a sample  $\text{\LaTeX}$  folder (zipped).

# Term Project

- ▶ BB has a sample  $\text{\LaTeX}$  folder (zipped).
- ▶ BB has IPython notebook examples.

# Term Project

- ▶ BB has a sample  $\text{\LaTeX}$  folder (zipped).
- ▶ BB has IPython notebook examples.
- ▶ BB has a sample pythong module.

# Term Project

- ▶ BB has a sample  $\text{\LaTeX}$  folder (zipped).
- ▶ BB has IPython notebook examples.
- ▶ BB has a sample pythong module.
- ▶ These are under "Content".

# Term Project - Python

- ▶ Install and use Anaconda for Python 3.

# Term Project - Python

- ▶ Install and use Anaconda for Python 3.
- ▶ Your IPython notebook must import your module along with any others you are using.

# Term Project - Python

- ▶ Install and use Anaconda for Python 3.
- ▶ Your IPython notebook must import your module along with any others you are using.
- ▶ If you must install a package not included in the Anaconda distribution, mention this in your notebook and in your written report.

# Term Project - Python

- ▶ Install and use Anaconda for Python 3.
- ▶ Your IPython notebook must import your module along with any others you are using.
- ▶ If you must install a package not included in the Anaconda distribution, mention this in your notebook and in your written report.
- ▶ Your IPython notebook must launch an *interactive* python application.

# Term Project - Python

- ▶ Install and use Anaconda for Python 3.
- ▶ Your IPython notebook must import your module along with any others you are using.
- ▶ If you must install a package not included in the Anaconda distribution, mention this in your notebook and in your written report.
- ▶ Your IPython notebook must launch an *interactive* python application.
- ▶ Use Bokeh plotting and Bokeh Server to run analyses according to *user input* entered via *widgets*.

- ▶ Install the Tex Live distribution of  $\text{\LaTeX}$ .

- ▶ Install the Tex Live distribution of  $\text{\LaTeX}$ .
- ▶ TeXworks is an IDE for  $\text{\LaTeX}$  available in Windows and OS X.

- ▶ Install the Tex Live distribution of  $\text{\LaTeX}$ .
- ▶ TeXworks is an IDE for  $\text{\LaTeX}$  available in Windows and OS X.
- ▶ MacTeX is the recommended installation for OS X, and includes the TeXShop IDE.

- ▶ Install the Tex Live distribution of  $\text{\LaTeX}$ .
- ▶ TeXworks is an IDE for  $\text{\LaTeX}$  available in Windows and OS X.
- ▶ MacTeX is the recommended installation for OS X, and includes the TeXShop IDE.
- ▶ LyX is a WYSIWYM editor and is not recommended on any platform.

- ▶ Python was created by Guido van Rossum in the Netherlands. Van Rossum remains BDFL.

- ▶ Python was created by Guido van Rossum in the Netherlands. Van Rossum remains BDFL.
- ▶ Whitespace is meaningful!

- ▶ Python was created by Guido van Rossum in the Netherlands. Van Rossum remains BDFL.
- ▶ Whitespace is meaningful!
- ▶ Supports OOP, functional programming and other paradigms

- ▶ Python was created by Guido van Rossum in the Netherlands. Van Rossum remains BDFL.
- ▶ Whitespace is meaningful!
- ▶ Supports OOP, functional programming and other paradigms
- ▶ Standard for data science and many other applications
